

Become an active part within the Smart Process Manufacturing Kongress 2019.

**Call for
Papers**

24./25.09.2019, Würzburg

Submissions on following topics are highly welcome

- Application-ready industry 4.0 methods, technologies, processes and tools
- Industry 4.0/IIoT- Field reports from the process industry
- Cybersecurity in the Industry 4.0 Environment
- Current Status: Standards in the Digital System
- Current Status: Modularization and Industry 4.0
- Integrated Engineering in the Plant Life Cycle
- KI experience with the use of learning systems
- Smart production in the supply chain network
- Data Analysis and Predictive Maintenance

Submit your abstract by May 15 2019!

Application and industry reports on successfully implemented strategies and concepts, on technical innovations and solutions but also on the challenges of implementing a digital plant concept are welcome. Tandem lectures with operators are preferred because of their stronger practical relevance.
