NEW: Safety Funnel with Level Control

Keep filling levels in non-transparent containers safe and easy under control.

MADE IN GERMANY.
20 years of experience in safe handling of liquid waste.
Questions:

Is there still enough capacity or will it overflow?

- Heavy steel funnel
- Corrodible
- No level control
- Overflowing containers
- Flame retardant sieve is ineffective against ignition risks
- Complicated cleaning
- Wide body, doesn’t fit into common safety cabinets

ARRRGHHH, WHAT A MESS!

スピリチュアルな存在!!!
Well that’s smart! The level control enables safe and easy change of containers at the right time.

- Lightweight construction. Material: electrostatic conductive PE-HD
- Integrated level control
- No more overflowing containers
- Grounding cable and clamp included
- Removable sieve for easy cleaning
- Space saving construction, suitable for every safety cabinet

Container is almost full: time to act!

Removable Sieve

One of the most useful gadgets ever!

www.scat-europe.com
Collecting flammable liquids always means to deal with fire risks. Fluid stream may cause static charges which lead to sparking and increase the hazard of ignition. S.C.A.T. Europe is a pioneer of protection against ignition risks in laboratories. Our Safety Funnels are made of electrostatic conductive PE-HD and already include grounding cable and clamp.

Find more clever solutions and accessories for safe grounding in our main catalogue and online at:
