Business Areas

Services

CGI Consulting

Developing concepts and providing support when launching CGI processes and technologies.

CGI Productions

Implementing CGI projects and interactive content for print, film and interactive applications.

Visualization Data Management

Turning design data from industrially made products into 3D visualization models to create image and film material.

Visual Effects

Implementing highly complex sequences in feature films, TV series and advertising productions.

Products

High-end 3D products

- Motionbox – the unique film database specializes on the tough demands of CGI-based film productions.
- Picture Shooter is a web-based, virtual photo studio. On the basis of prepared product data photorealistic 3D visualizations can be presented professionally and in top quality.
- Media Server is a dynamic image database that generates configurable product pictures in any configuration in premium quality and real time.
- The purpose of the Configuration Backbone is to define and manage complex configuration logic for data-based visualization.

Solutions

Next Level of User Experience

With innovative technologies and over 20 years' experience in automotive visualization, we develop turnkey solutions for first-class and extensive production presentations.

Whether it's a question of online or showroom configurators, from concept development to implementation we can create interactive worlds to experience. Depending on the application and geared to your requirements, we can deliver virtual, augmented, mixed reality and pre-rendered solutions. We'd be happy to advise you – just contact us.

Awards

Mackevision is regularly presented with renowned awards. This is just a small round-up of our successes:

Automotive Brand Contest

- Winner "Toyota Auris", category: campaign

New York Festivals

- Gold World Medal for "Porsche 918 Spyder", category: event venue

Primetime Emmy Awards

- Emmy for "Game of Thrones, Season 4", category: outstanding visual effects

Clients
