

CONTINUOUS FLUID BED SPRAY AGGLOMERATION

GF ModFlex

- » Food agglomeration in Ex-design
- » Various capacities available
- » Low investment costs
- » Low operating costs
- » Minimized installation space
- » Fastest installation time

GF MODFLEX – CONTINUOUS FLUID BED SPRAY AGGLOMERATION

Plug & play installation thanks to the newly developed modular and compact plant concept.

Improve your processes by:

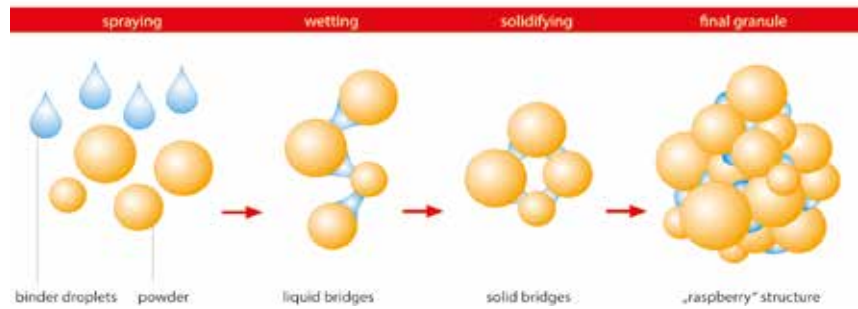

- » dedicated design for powder agglomeration
- » flexible adaption to customer requirements
- » multiple processing zones for maximum flexibility
- » top or bottom spray systems
- » easy operation

You will benefit from:

- » reduction of total dimensions
- » separation into production/technical area (integrated zoning)
- » WIP (washing in place) for the Glatt fluid bed agglomeration unit
- » latest GlattView Varia/Varia+ process control system
- » easy and safe filter change
- » high filter efficiency and filter life time

Spray Agglomeration

Size (examples)	GF ModFlex 350	GF ModFlex 750
Process	fluid bed spray agglomeration	
Capacity	750 to 1,000 kg/h product	1,500 to 2,000 kg/h product
Design	hygienic design / designed for automated wet cleaning Ex-design St 1	
Delivery	insulated fans, air handling units, inlet air section of GF ModFlex no further equipment insulation necessary complete delivery
