

When your hardware and software need service ...

... we're always on board.

On course for success! Every day we give our best to put the individual service concepts of our customers into practice. Flexibility and competence make us your reliable partner in all aspects of electronic repairs.

Your partner for service and repair of electronics.

Your reliable partner for electronic services

Electronic repair & rework

Our portfolio of services includes reworks and repairs in line with your requirements. Detailed error analyses, short processing times and an intelligent parts management system mean that repairs are undertaken with the greatest efficiency. Moreover, we modify the assemblies accordingly, whether a production error, an upgrade or a simple correction is needed – exactly to your requirements and in the shortest possible time.

Chip-Level Repair

Our know-how, our many years of experience and high quality facilities set new standards in chip level repairs.

- Soldering as of model 0201
- Guidelines IPC A610 & IPC 7711/7721
- Component replacement SMD up to model 0201
- Component replacement THT & press-fit technology
- Repairs of conductive tracks (cut)
- Attachment of jumpers (high-wire)

BGA Exchange

Your BGA repair can be carried out immediately with our optimized soldering processes.

» A first pass yield quote of over 98% in BGA exchange is the best evidence for our performance.

- BGA exchange (Standard & Hard Balls)
- BGA Reballing
- Fine Pitch IC processing
- Sockets replace
- QFN and MSOP replace

Module-Level Repair

Our optimized processes mean that the replacement of defective components can be carried out in the shortest possible time, enabling us to place the product at the disposal of the customer again within 48 hours.

- Refurbishment of devices
- Display and touch panel installation
- Assembly, repackaging and fulfilment

Software and Programming

We tailor our services to your requirements. We record or modify your software with new updates.

- Software programming and modifications
- BIOS update and modifications
- Firmware update with modifications
- HDD programming and HDD reduction

Error Analysis and Testing

Our state of the art facilities enable us to do a target-oriented and precise error analysis, as well as excellent quality of supply as the result of diverse test and analysis procedures.

- Functional test
- Flying Probe test
- Boundary scan
- X-ray analysis
- Optical inspection
- Climate check and temperature test
- High-voltage test
- Quality check

» Place your trust in us: We take up the challenge in order to offer our customers the best possible service.
