BENCH line

Safety storage cabinets in modern design

**Type 90**

For passive and active  
storage of flammable liquids

# Innovative solutions for safe and convenient storage and handling

We have been setting standards with our safe, convenient and cost-effective solutions for the storage of hazardous substances for many years. We maintain a constant dialogue with our customers, listen to their wishes and needs, improve on them and realise them as new products.

» Customer-oriented

» Innovative

» Built on industry expertise

We are also a market-leader in the development and implementation of solutions designed to increase efficiency and reduce effort in workflows. These range from small, practical details like push-to-open door technology to comprehensive, high-tech concepts like the transfer of information within networks of safety storage cabinets. Every year, we bring numerous innovations to market-maturity in full compliance with applicable regulations and standards.

**We work continuously to fulfil our promise of optimum solutions for your needs and ensure that you always feel safe and secure in your work.**

## More flexibility for passive and active storage

Our BENCH line is the answer to numerous wishes for greater under-bench storage capacities. Thanks to an increase in height of 174 mm against the UTS ergo line®, it is now possible to store 2.5l containers on two levels, two 20l canisters or a 30l drum. The BENCH line represents the next step in the continuing development of solutions for passive and active storage. It provides even more flexibility for your laboratory or workplace, while providing 90 minutes fire resistance.

### The BENCH line portfolio

- 1** Bench line with two fully usable levels for the storage of 2.5-litre containers.
- 2** SUPPLY Bench for active storage of 30-litre drums and pressurised dispensing.
- 3** DISPOSAL Bench for the active storage of wastes in two separate 20-litre canisters.
- 4** The push-to-open wing door technology allows the safety doors to be opened smoothly by only light pressure on the front panel.
- 5** Automatic roll-out of pull-out tray for the collection of flammable liquids.
