

TFX OEM® OVER-THE-NEEDLE PEELABLE INTRODUCERS

CUSTOM OTN INTRODUCERS ARE AVAILABLE IN TWO STYLES

- Safety over-the-needle (OTN) introducer has a passive safety device that is activated automatically.
- Both safety and standard OTN introducers are available in sizes 2F to 6F, (approximately 22 GA to 14 GA needle size). *See chart on opposite side.*
- Applications: Percutaneous insertion of small PICC, midline, or other peripheral catheters and pacing leads.
- Clear, large volume, flashback chamber allows for visualization and blood containment.
- Flashback plug permits use of syringe.
- Funneled hub design for smooth insertion of PICC, midline, or other catheters.
- Peel-apart introducer for easy removal.
- Ribbed wing design for secure handling.
- Needle is silicone coated to minimize resistance during insertion.
- Smooth transition between needle and the sheath to minimize tissue trauma.
- Cover tube protects the needle prior to use.

Standard OTN Peelable Introducers

PARTNER WITH TELEFLEX MEDICAL OEM

Whether you need a component or a finished medical device, Teleflex Medical OEM should be your product development and outsourcing partner. Along with our "can-do" attitude, we offer engineering expertise, extensive prototyping and manufacturing capabilities, regulatory services, and a dedication to customer service.

SAFETY OTN PEELABLE INTRODUCERS

- Personnel are protected by a passive safety device that is activated automatically.
- Meets OSHA safety requirements.
- Sizes 2F to 6F, (approximately 22 GA to 14 GA needle size).
